U.S. horticultural product exports during the first 6 months (October-March) of fiscal year (FY) 2000 totaled \$5.2 billion, unchanged from the same period last year. Sales to Canada, the largest U.S. horticultural export market, continue strong, with shipments during October-March valued at \$1.5 billion, up 4 percent from the same period the previous year. Mexico is now the fourth largest market for horticultural exports and this trend will likely continue in FY 2000. Through the first half of FY 2000, U.S. exports of horticultural products to Mexico were valued at \$434 million, up more than 30 percent from the same period last year. However, exports to Japan during the October-March period of FY 2000 were valued at \$840 million, unchanged from the same period last year.

Export Summary

U.S. exports of horticultural products to all countries in March totaled \$879 million, down slightly from the same month a year earlier. Six of the 15 product categories registered value increases. Categories with the most significant increases in March were hops (up \$2.2 million or 34 percent) and dehydrated vegetables (up \$4.2 million or 18 percent). The categories with the most significant decreases were dried fruit (down \$12 million or 32 percent) and tree nuts (down \$18.3 million or 23 percent). For FY 2000 to date (October-March), the total value of U.S. horticultural exports was \$5.2 billion, slightly down from the same period in FY 1999.

To access **FAS Attache Reports** online, please reference the following Internet address:

<http://www.fas.usda.gov/scriptsw/attacherep/default.asp>

Search through the country and market reports prepared by FAS attaches covering over 20 horticultural and tropical product commodities and nearly 130 countries. Search by keyword, including country and commodity.

Cocoa and Honey Reporting Coverage Discontinued

Beginning with the June, 2000, Tropical Products: World Markets and Trade Circular and the November, 2000, Sugar: World Markets and Trade Circular, commodity and country analysis and statistical tables for cocoa and honey will be discontinued. This decision was necessitated due to declining Foreign Agricultural Service budget resources and the need to more strategically target remaining resources in support of the agency's primary mission to facilitate the expansion of export opportunities for U.S.-produced agricultural commodities. The Horticultural and Tropical Products Division (HTP) expects to continue to receive voluntary reporting on cocoa and honey production and trade from an abbreviated number of countries and these will continue to be posted on the FAS and HTP Home Pages upon receipt.

What's New on the Homepage?

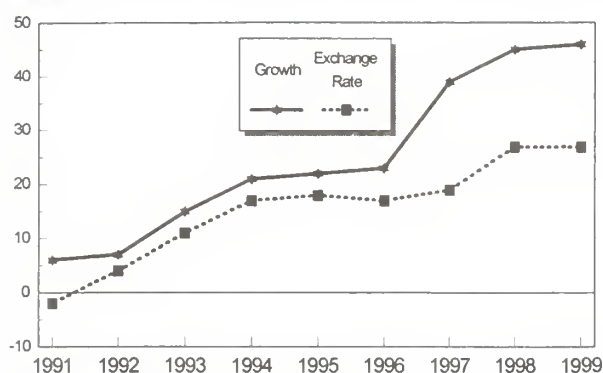

The Horticultural & Tropical Products Division has introduced an enhanced feature on its homepage designed to bring the latest information to the public as efficiently as possible. The site will contain information on policy and technical developments affecting trade in horticultural commodities, as well as selected reports submitted by FAS overseas offices and special reports prepared by the division. The information will typically remain on the site for approximately one month, before being archived. For further information on this new feature, please contact Nancy Hirschhorn (202) 720-2974. Go to <http://www.fas.usda.gov/http/> and click on "What's New?"

Canadian Horticultural Imports

A strong demand for higher priced fresh fruits, wine, fruit and vegetable juices and non-alcoholic beverages together with a strong increase in demand for low priced U.S. vegetables have, over the last three years, contributed to significant increases in Canadian horticultural imports. The U.S. market share of total Canadian horticultural imports is steady, fluctuating between 58 and 62 percent since 1990. Other major competitors in the Canadian market include the European Union with 15 percent, due predominantly to large shipments of beer and wine, Mexico with 4 percent and Chile with 3 percent due to shipment of off-season fresh fruit and vegetables.

Canadian Horticulture Imports

Nominal Growth in Value from the U.S. and Exchange Rate Movement
Percent

Source: Statistics Canada and the World Trade Atlas
Values in U.S. dollars - indexed to 1990

Overview

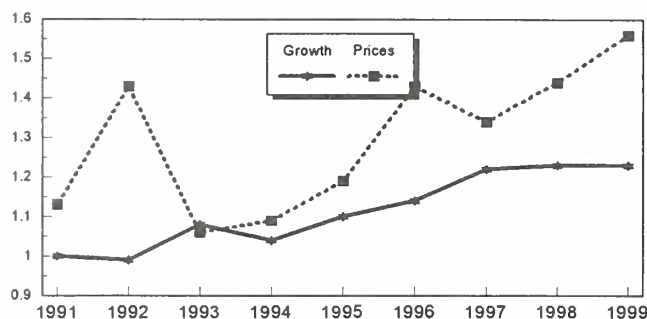

For the first seven years of the past decade, real Canadian horticultural imports, adjusted for exchange rate movement against the U.S. dollar, remained flat. Beginning in 1996, the value of the U.S. dollar against the Canadian dollar appreciated 10 percent, while the value of Canadian horticultural imports increased by 18 percent. Thus, for the last three years, real growth, as measured by the difference between the nominal growth rate and the indexed exchange rate, reached 8 percent totaling 19 percent for the last ten years. The growth in horticultural imports since 1996 more than equaled the cumulative growth of the first seven years.

Fruits and Nuts

Since 1990, the value of the Canadian dollar has fallen 27 percent against the U.S. dollar making imports that much more expensive. However as the graph on the next page shows, Canadian demand for fruit and nuts remained consistently strong. Imports from the United States increased 23 percent over the decade despite the weak Canadian currency and increasing U.S. prices.

The graph below traces the movement of Canadian imports of U.S. fruits and nuts together with the National Agricultural Statistical Service (NASS) index farm price for U.S. fruits and nuts adjusted to reflect exchange rates. As can be seen, imports from the United States increased over 23 percent

Canadian Horticulture Imports
Growth of Fruits and Nuts Imports from the U.S. vs Exchange Rate Adjusted Price
Index 1990 =1

Source : Statistics Canada and the World Trade Atlas, NASS Fruit and nut price index
Values indexed to 1990

from the 1990 level despite a 50 percent price increase to Canadian consumers. Fruit and nut imports from the United States were off from the previous year due to a decline in shipments of oranges, apples, and shelled almonds. The United States accounts for 60 percent of Canadian imports of tree nuts and 55 percent of the fruit imports.

Vegetables

The United States supplies 80 percent of Canada's vegetable imports. Low U.S. farm prices benefitted Canadian consumers and fostered growth of U.S. shipments. Imports from the United States grew by 45 percent since 1990, while exchange rate adjusted NASS farm gate prices have generally remained under the 1990 bench mark. The following graph shows the movement of prices and imports.

A few of the leading vegetable growth items are potato chips, frozen french fries, carrots, lettuce, frozen mixed vegetables, canned whole tomatoes and ketchup.

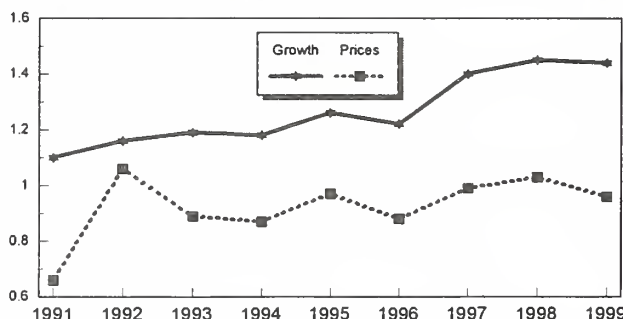

Significant Growth Items Since 1996

Canadian imports of high value items from the world include, soft drinks and waters up \$104, million or 112 percent, U.S. market share 85 percent; table wine up \$138 million or by 40 percent, U.S. market share 15 percent; sparkling wine up \$65 million or 135 percent; U.S. market share 6 percent; lettuce up \$22 million or by 22 percent, U.S. market share 99 percent; strawberries up \$18 million or by 79 percent, U.S. market share 97 percent; other fruit juices (including mixtures) up \$22 million or by 55 percent, U.S. market share 80 percent.

(For information on production and trade, contact Robert Knapp at 202-720-4620.)

World Trade Situation and Policy Updates

ITC Rules Imports of Chinese Apple Juice Injure U.S. Apple Juice Industry

On Monday, May 15, the U.S. International Trade Commission (ITC) issued a final determination that the U.S. apple juice industry has been materially injured by imports of concentrated apple juice (CAJ) from China. This decision follows the Department of Commerce's final ruling in April that Chinese apple juice was being sold into the U.S. market at less than fair value. At that time, final antidumping duties on imported CAJ imports from China ranging from 0 to 52 percent were established. The Department of Commerce will now instruct its Customs officials to assess the antidumping duties on all imports of Chinese non-frozen apple juice concentrate and it is expected that the final duties will take effect in approximately two weeks. Since the ITC's preliminary affirmative injury ruling on the case last July, U.S. imports of CAJ from China through February were off nearly 70 percent on a volume basis, and down 55 percent value basis, compared to the same period in the preceding year.

Mexico's New Documentation Requirements For Imported Apples Not Expected To Hamper U.S. Sales

The Mexican government published in the May 10 issue of the *Diario Oficial* new documentation requirements for some imported products, including apples. It is now mandatory that imported apples from the United States, Canada, and Chile include specific information on the invoice or import documents, such as tariff classification number, the variety, quality and grade specifications, and the size. The ostensible purpose of the new requirement is to better identify the product with regard to Mexico's reference price system. Mexico is the largest foreign customer for U.S. apples. In marketing year 1998/99 (July-June), U.S. apple exports to Mexico reached 119,528 metric tons, valued at \$66 million, up 90 percent, both in quantity and in value, from the preceding year. The new import regulation is not expected to create problems for U.S. apple sales to Mexico, as a majority of exporters already include the above mentioned information on their invoices.

New Russian Import Regulation Could Boost U.S. Juice Exports To Russia

Effective on January 1, 2001, new standards and duties for juice imports will apply. The new standards distinguish between juices, nectars and other products, and require additional labeling information such as the name of the juice, its contents, and processing method. The import duties for juice concentrates were reduced from an average of 15 percent to 5 percent ad valorem. The value of U.S. fruit and vegetable juice exports to Russia has declined drastically in recent years. U.S. juice exports to Russia were valued at \$5 million in calendar year (CY) 1994, but have since fallen to less than \$30,000 in CY 1999. These new regulations are expected to spur increased U.S. juice sales to Russia.

National Organic Standards Board to Meet in June

The U.S. Department of Agriculture's National Organic Standards Board (NOSB), which grew out of the Organic Foods Production Act of 1990, is scheduled to meet June 6-7. It has six committees addressing issues related to crop standards, processing, labeling and packaging standards, livestock standards, accreditation, materials, and international trade. The meeting is open to the public and will be held at the Hilton Crystal City, 2399 Jefferson Davis Highway, Arlington, Va., from 9 a.m. to 5 p.m. ET. Time has been scheduled for public comment on June 6, 1:30 p.m. to 4:00 p.m. Those wishing to provide written or oral comments to the board on any organic issue should send requests to Toni Strother, USDA-AMS-TMP-NOP, Room 2510-So., Ag Stop 0268, P.O. Box 96456, Washington, D.C. 20090-6456, or fax (202) 205-7808 by June 2. For more information, call (202) 720-3252.

Mexico Requests Expansion of Hass Avocado Import Program

Mexico has asked USDA to consider expanding the number of states allowed to import Hass avocados and to increase the length of the shipping season. Under the current regulation, fresh Hass avocado fruit grown in approved orchards in approved municipalities in Michoacan, Mexico, may be imported into specified areas of the United States, subject to certain conditions. The regulation allows Mexican Hass avocados to be imported into the United States only during the months of November, December, January, and February and distributed only in the District of Columbia and the following northeastern states: Connecticut, Delaware, Illinois, Indiana, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, and Wisconsin. Mexican agricultural officials have asked that the shipping season start one month earlier and end one month later. They have also requested that the United States consider allowing Hass avocados to be imported into additional northern-tier states that do not contain host material for any avocado-specific pests and have climatic conditions that do not support the establishment of fruit flies. The Mexican government has not yet identified the specific states that it believes might meet those criteria. For more information, contact Wayne D. Burnett, APHIS, at (301) 734-6799.

Trade Data Available Online for 67 Horticultural Commodities

The Horticultural & Tropical Products Division has introduced a new feature on its homepage designed to provide the public with U.S. export and import data on a calendar year and marketing year basis for 67 horticultural commodities. All trade files include five years of historical data as well as year-to-date trade data and can be viewed or saved in PDF or Lotus format. The data will be updated every month during the last week of each month. For further information on this new feature, please contact Karina Ramos at (202) 720-6877. To access the trade data go to <http://www.fas.usda.gov/http/> and click on "Trade Data."

USDA Introduces Online Import Authorization and Tracking System

On May 12, USDA launched a new feature on its new website that will allow customers to submit online applications to import fruits, vegetables, and animal products into the United States. Importers can access the site by going to APHIS' Home Page at www.aphis.usda.gov and clicking on Import Authorization System under hot issues. In addition to applying for import permits online, customers can also renew or amend existing applications. The site lists the guidelines and user fees needed to apply for an APHIS permit and includes an index of fruits, vegetables, and animal products that can be imported. After submitting an application, the site gives every customer a tracking number that can be used to check the status of their permit request. Because importers cannot sign their online applications before they submit them, online customers must sign their permits after they are issued.

Organic Updates

FAS Magazine Goes Organic

“The Whole World Is Going Organic” is the theme of the June 2000, all-organics issue of FAS’s *AgExporter* magazine. It features an interview with the Organic Trade Association’s executive director; articles on export opportunities in the U.K., Taiwan, France, Germany, and Hong Kong; advice from successful U.S. exporters of organic commodities and processed products; and more. The magazine can be viewed at the FAS home page: www.fas.usda.gov

Morocco Gears Up to Supply France with Organic Products

A recent article in *Libre Service Actualités*, a magazine for the retail food sector, described Morocco’s emerging organics sector and its intentions to supply organic produce to the EU market, particularly France. The French organics market, valued in 1999 at \$533 million or about 0.3 percent of total food consumption, is growing rapidly. Although consumption still lags other more developed markets in the EU, demand for organic products exceeds supply, so the potential to expand is great. Four months ago, the Association of Organic Products was established to represent the interests of Morocco’s organics sector, and French certifiers—*Ecocert* and *Qualite France*—have set up shop there to assure that products conform to French norms and EU regulations established for organics. Morocco’s organic production is concentrated on fresh fruit and vegetables, mainly tomatoes, peppers, cucumbers, eggplants, oranges and aromatic herbs. Given current production methods, it is believed that Morocco’s 400,000 small farms will be easy to convert to organic farming. Production has been doubling each year and is currently at 8,000 tons. Morocco faces competition for the French market from Italy and Spain which have an advantage as members of the EU, and from Turkey (dried fruits) and Israel (grapefruit, avocado and olives). However, Morocco hopes to build on the close ties it has already with France which currently absorbs 55 percent of Morocco’s conventional fresh fruit and vegetable exports.

New Zealand Organics

Organic Exports - In 1994-95, New Zealand’s organic exports were worth NZ\$8 million (\$US4 million), and they are projected to grow to NZ\$60 million (\$US30 million) in the next two years. Japan is the largest market, accounting for 47 percent of the exports which consist mainly of kiwifruit, processed vegetables and baby food. Thirty-two percent of New Zealand’s exports, mainly fruit and vegetables, go to Europe, and Australia is emerging as a promising market. On the domestic side, the market is growing rapidly as New Zealand’s three supermarket chains pay more attention to organics. Although at present New Zealand’s organic output is primarily fresh fruit and processed vegetables, small quantities of organic meat, wool and dairy products are also available.

Organic Kiwifruit Increasing - New Zealand's largest grower of organic produce, the kiwifruit industry, is set to almost double its exports this season. Three years ago, a number of conventional growers decided to begin the transition to organic methods and are this year coming into fully certified organic production. As a result, output is expected to grow by about 80 percent, boosting the organic share of total production to about 4 percent. Over the next five years, the organic share is expected to comprise about 8-10 percent of national production. Prices in Europe, Japan and the United States for organic kiwifruit from New Zealand have ranged from 8-15 percent above prices for conventional fruit.

Sustainable Agriculture Video Project for China

FAS's Research and Scientific Exchange Division, International Cooperation & Development (RSED/ICD)*, is working with a Chinese non-governmental organization called Global Village Beijing (GVB) to produce a video series on sustainable agricultural practices in the United States. By highlighting key issues in the success of U.S. agricultural sustainability, the video sequence will serve as an educational model for developing sustainable agriculture in China. Key technical experts from USDA, US EPA, U.S. universities, and other organizations are contributing to the project with their practical insights in the following subject areas: USDA agricultural policy and history of sustainable agriculture; research, extension and education systems; agriculture's contribution to river basin management; soil erosion control; forest management and policy; organic farming; animal waste control; aquaculture; biotechnology in agriculture; irrigation; and Integrated Pest Management.

The video series will be broadcast on Chinese Central Television 7, the national science and technology station during GVB's "Time for Environment" program with an estimated audience of over 90 million, and on Chinese Central Television 2, the national economics and business channel, during the "Economics Half Hour" program which has an estimated audience of 150 million people. In addition to national broadcasts, the videos will appear on China provincial television stations and will be used as a teaching supplement in Chinese agricultural universities. *For more information about this project, contact Melissa Clarkson at 202-720-4090 or clarkson@fas.usda.gov*

* RSED provides financial and technical support for collaborative scientific research involving U.S. and foreign scientists and facilitates project implementation from the development stage through final evaluation. Cooperation is encouraged to promote sustainable agricultural and forestry systems; help secure a safe and adequate food supply; avert potential threats to U.S. agriculture and forestry; develop new technologies; and enhance agribusiness and trade in foreign markets. Participating countries benefit through a variety of activities including both short and long-term visits of U.S. and foreign scientists, collaborative research projects, technical workshops, and links to a network of agricultural experts in USDA, other federal agencies, the university system and private sector organizations.

For more news on organics, see HTP's monthly newsletter "Organic Perspectives," available at the HTP home page: www.fas.usda.gov/http/organics/organics.html. The newsletter contains reports on organics from around the world gleaned from attache reports, trips made by HTP's organics staff, and other sources. The newsletter also covers items of interest about the U.S. national organic

program and the domestic organic industry. A list of upcoming conferences, trade shows and other events is included in every issue.

(For further information, contact Janise Zygmunt at 202-720-1176.)

Export News and Opportunities

USDA Amends GSM-102 Credit Guarantees to Southeast Asia and South Korea

On May 5, the U.S. Department of Agriculture (USDA) amended Commodity Credit Corporation's Export Credit Guarantee Program (GSM-102) for the Southeast Asia Region for fiscal year 2000 to change the country destinations. Eligible destinations are Malaysia, the Philippines, Thailand, Vietnam, and Singapore. Authorization for coverage to the Southeast Asia Region remains unchanged at \$90 million. All other terms and conditions as previously announced remain the same. The previous FAS announcement pertinent to the Southeast Asia GSM-102 program is PR 0553-99.

On May 22, USDA increased by \$75 million the amount of operational credit guarantees available for sales of U.S. agricultural commodities to Korea under the FY 2000 GSM-102 program. This brings the operational amount for the FY 2000 credit guarantees to \$575. The total FY 2000 allocation to South Korea remains unchanged at \$590 million, with \$15 unallocated. All other terms and conditions as previously announced remain the same. The previous FAS announcements pertinent to South Korea's GSM-102 program are PR 0477-99, PR 0537-99, PR 0027-00, and PR 0119-00.

Exporters may apply for credit guarantees on a first-come, first-served basis to cover sales of any of the commodities specified in the GSM list of commodities published in FAS program announcement PR 0003-00, issued January 5, 2000, or as superseded. The list of eligible commodities will apply to all individual country and regional announcements unless otherwise stated in the announcements. The following horticultural products are eligible under the export credit guarantee programs for FY 2000: dried fruit; fresh fruit; frozen fruit; canned fruit; 100-percent fruit juices; fruit and vegetable concentrates, pastes, pulps and purees; honey; hops or hops extract; beer; tree nuts; fresh vegetables; canned vegetables; dried vegetables; wine; and brandy. From time to time, this list may be amended as additional commodities become eligible. The allocation does not assign dollar amounts to any of the commodities specified in the GSM list of commodities, providing buyers and sellers maximum flexibility in arranging the size of their transactions within the scope of the overall allocation.

The GSM-102 program makes available credit guarantees for sales of U.S. agricultural commodities overseas. USDA does not provide financing, but guarantees payments due from foreign banks. USDA typically guarantees 98 percent of the principal and a portion of the interest. The GSM-102 program covers credit terms from 90 days to 3 years.

Under the program, once a firm sale exists, the qualified U.S. exporter applies for a payment guarantee before the date of export. The U.S. exporter pays a fee calculated on the dollar amount guaranteed, based on a schedule of rates applicable to different lengths of credit periods. The Commodity Credit Corporation (CCC)-approved foreign bank issues a dollar-denominated,

irrevocable letter of credit in favor of the U.S. exporter, ordinarily advised or confirmed by the financial institution in the United States agreeing to extend credit to the foreign bank. The U.S. exporter may negotiate an arrangement to be paid as exports occur by assigning the U.S. financial institution the right to proceeds that may become payable under the guarantee, and later presenting required documents to that financial institution. Such documents normally include a copy of the export report.

If a foreign bank fails to make any payment as agreed, the exporter or the assignee may file a claim with USDA for the amounts due and covered by the guarantee. USDA will pay the U.S. bank and will take on the responsibility of collecting the overdue amount from the foreign bank.

The GSM-102 table presents the FY 2000 GSM-102 for which USDA has authorized credit guarantees for sales of U.S. horticultural products as of May 19, 2000. Additional information about the GSM-102 program, regulations, country specific press releases and program announcements, and a Monthly Summary of Export Credit Guarantee Program Activity may be accessed on the Internet at:

<http://www.fas.usda.gov/excredits/exp-cred-guar.html>

Supplier Credit Guarantees Available to Egypt and West Africa

On May 8, the U.S. Department of Agriculture (USDA) amended the Commodity Credit Corporation's Supplier Credit Guarantee Program (SCGP) for West Africa to increase the allocation and to change the eligible country destinations. The allocation is increased from \$10 million to \$45 million. In addition, Burkina Faso, Cameroon, Cape Verde, Gabon, and Gambia have been added to the list of eligible countries. Eligible destinations under the fiscal year (FY) 2000 SCGP for the West Africa Region now include: Benin, Burkina Faso, Cameroon, Cape Verde, Cote d'Ivoire, Gabon, Gambia, Ghana, Nigeria, and Senegal. All other terms and conditions as previously announced remain the same. The previous announcement pertinent to the West Africa region is PR 0490-99.

The SCGP is unique because it covers short-term financing extended directly by U.S. exporters to foreign buyers and requires that the importers sign a promissory note in case of default on the CCC-backed payment guarantee. The SCGP emphasizes high-value and value-added products, but may include commodities or products that also have been programmed under the GSM-102 program.

The Supplier Credit Guarantee table presents the FY 2000 Supplier Credit Guarantee Program for which USDA has authorized credit guarantees for sales of U.S. horticultural products as of May 19, 2000. Additional information about the SCGP, regulations, country specific press releases and program announcements, and a Monthly Summary of Export Credit Guarantee Program Activity may be accessed on the Internet at:

<http://www.fas.usda.gov/excredits/scgp.html>

The General Sales Manager will consider requests to establish a SCGP and/or GSM Program for a country or region or amend an authorized program to include horticultural commodities and products which are currently not eligible.

The SCGP encourages exports to buyers in countries where credit is necessary to maintain or increase U.S. sales but where financing may not be available without CCC guarantees. Under the SCGP, CCC guarantees a portion of payments due from importers under short-term financing (up to 180 days) that exporters have extended directly to the importers for the purchase of U.S. agricultural commodities and products. These direct credits must be secured by promissory notes signed by the importers. CCC does not provide financing but guarantees payment due from the importer.

Program announcements which can be accessed on the Internet provide information on specific country and commodity allocations, length of credit periods, the required form of promissory note, and other program information and requirements.

(For further information on the SCGP or GSM-102 Program for horticultural commodities, contact Yvette Wedderburn Bomersheim, 202-720-0911 or Elizabeth Mello 202-720-9903).

Summaries and selected tables from many Foreign Agricultural Service world market and trade reports are available electronically. The reports include U.S. Export Sales (available electronically after 8:30 a.m. on release day); Grain: World Markets and Trade; Oilseeds: World Markets and Trade; Cotton: World Markets and Trade; Tobacco: World Markets and Trade; World Agricultural Production; the early release version of World Horticultural Products and U.S. Export Opportunities; and Tropical Products: World Markets and Trade (all available electronically after 3:00 p.m. Washington DC time on release day) as well as Sugar: World Markets and Trade; Livestock and Poultry: World Markets and Trade; Dairy: World Markets and Trade, and U.S. Planting Seed Trade (available within a week after release.)

You can read the reports on the FAS home page (<http://www.fas.usda.gov>). The reports remain "current" until the succeeding issue is available. Older issues are available in the archives section of the home page. We also make selected cover articles and graphics available from these publications, in a separate section of the site. Reports are also available from the Economic Bulletin Board at Stat-USA, on the same schedule. For more information, you may contact Stat-USA at (202) 482-1986 (Monday-Friday, 8:30-5:30 p.m. Washington, DC time.)

For more information on the FAS home page, contact Glenn Kaup, tel. (202) 720-3329; fax. (202) 720-3229; or via e-mail kaup@fas.usda.gov

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, sexual orientation, or marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotope, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice and TDD). USDA is an equal opportunity provider and employer."
